

ARYAN KUMAR SINHA

SOFTWARE ENGINEER

ABOUT ME

My name is Aryan, and I am a Computer Science Engineering graduate. I love programming and am always eager to learn and try new things. I have hands-on experience with various programming languages, database management, and machine learning. I enjoy solving problems and working on projects that make a difference. My skills cover a range of technologies, and I am excited about discovering more. I am open to opportunities that match my skills and interests.

WORK EXPERIENCE

La Trobe University, Australia Research Internship

10/2023 - 04/2024

- In this Internship, I implemented a robust machine learning-based framework to detect smishing, achieving a 98% accuracy rate using ANN models.
- Collected and processed 50,000+ SMS datasets, applying feature engineering techniques like TF-IDF and word embeddings.
- Engineered and optimized diverse machine learning algorithms, such as Naive Bayes, SVM, Logistic Regression, CNN, and ANN, achieving a 50% improvement in smishing detection rates and cutting analysis time by 30%.
- Created a user-friendly web GUI for real-time smishing detection, enhancing the practical applicability of the model and increasing detection speed by 40%.
- Presented the project findings to university faculties and 10+ stakeholders, receiving positive feedback.
- Gained hands-on experience in machine learning, data processing, and cybersecurity, applying theoretical knowledge to real-world challenges.

PROJECTS

ANALYSIS AND IDENTIFICATION OF MALWARE USING MACHINE LEARNING WITH OPTIMIZED PARAMETER 2023

Minor Project

- Developed an advanced malware analysis and identification system using machine learning techniques.
- Achieved 95% accuracy in detecting obfuscated malware, with faster detection reducing analysis time by 40% and fewer false positives by 15%.

Song recommender using AI 2023

Hackathon

- Implemented in Python, using AI and data analysis to recommend songs based on user history.
- Achieved 86% accuracy in personalizing recommendations, effective across various music genres.

Setting High Score in Subway Surfer 2021

Personal Project

- Developed a Double Dueling Deep Q Network (D3QN) reinforcement learning algorithm to train model.
- Utilized Python and PyTorch, serving model using Tensorflow Extended (TFx).
- Set a high score of 14,569,684 in the game, placing in the top 1% of players globally.

ScannerontheGo 2024

Personal Project

- Developed a web-based application, enabling the extraction of stable frames from videos and automating the generation of multi-page PDFs.
- Engineered an automated frame extraction algorithm to identify stable frames from video inputs, achieving 99% accuracy in detecting non-blurry frames for PDF generation.
- Integrated an intuitive user interface with Flask, supporting seamless video uploads.

EDUCATION

Master of Technology In Artificial Intelligence & Machine Learning

2025 - 2027 GPA : 7.15

- Symbiosis Institute of Technology
- Pune, Maharashtra, IN

Bachelor of Technology In Computer Science & Engineering (CSE)

2020 - 2024 CGPA : 8.57

- Vel Tech Rangarajan Dr. Sagunthala R&D Institute Of Science And Technology
- Chennai, Tamil Nadu, IN

SKILLS

- Time management
- Communication
- Critical thinking
- Team Collaboration
- Adaptability

TECHNICAL SKILLS

- C
- Java - JavaFx, Springboot
- Python - Flask, Pygame, Tkinter, Selenium
- DBMS - MySQL, MongoDB, ScyllaDB
- ML - TF, Pil, Keras, OpenCV, Sklearn
- Basic Web Development - Html, CSS, JS, REST API
- Bash
- Tools & Platforms - Git, GitHub, Docker, Linux, Postman, VS Code

CERTIFICATES

Networking And Security Architecture With Vmware NSX

COURSERA 2020

CCNAv7: Introduction to Networks

CISCO 2022

Cybersecurity Essentials

CISCO 2022

Data Analysis for Biologists

NPTEL 2023
